

Continuing Education for Pharmacists

you are invited..

CHRONIC NON-CANCER PAIN (CNCP) MANAGEMENT & OPIOIDS: ADDRESSING CHALLENGES (PART I)

Submitted to CPDPP for Accreditation

OBJECTIVES:

1. To understand limitations of common therapeutic options in CNCP and be able to recommend those that may offer more benefit than harm.
2. To apply a consistent approach in considering & aiding in an opioid trial in patients with CNCP.
3. To appreciate potential problems with PRN opioid use in patients with CNCP.
4. To understand the rationale behind the suggested/recommended opioid dosage maximums (<50 & <90 MED/day) from the new 2017 Opioids in CNCP – Canadian Guidelines.
5. To utilize guidelines, resources, and conversational skills in a way that will help in working towards desired patient outcomes in day to day practice.
6. To explore the role of pharmacists in appropriate chronic pain management & opioid use.

This program will be offered in THREE sessions; please choose ONE & RSVP!
